WORK EXPERIENCE

Undergraduate Researcher, DSLAB, Jeonbuk National University May 2021 – Mar 2022

- Conducted research on applying **signed graph structures** to model complex relational data.
- Explored graph-based learning methods for improving node classification and link prediction.

External Researcher, AILAB, GIST Dec 2022 – Jun 2023

- Researched **hypergraph-based human trajectory prediction** models for crowd motion forecasting.
- Designed feature aggregation strategies leveraging higher-order spatial-temporal dependencies.

Machine Learning Engineer Intern, Naver Corporation Sep 2025 – Nov 2025

- **LLM-based synthetic data generation** and **reinforcement learning-based preference modeling**.
- Building scalable pipelines for preference dataset creation, preference training and alignment evaluation.

AI Research Intern, Netmarble Corporation Feb 2026 – Present

- Working on **VLM-based GUI / game agent development** and **QA test automation framework construction**.
- Developing **temporal GUI / game evaluation datasets** and **evaluation frameworks**.

PROJECTS

LLM-based Teacher Assistant for Elementary Education *Ice-cream Media*
Oct 2023 – Feb 2024

- Trained/deployed **Polyglot-ko-12.8b** with DAPT & NEPTune; improved responses via prompt strategies.
- Established BLEU/EM evaluation; led data curation and end-to-end training/inference pipeline.

CBRN Operations Assistant (AI Staff Support LLM) *Agency for Defense Development (ADD)*
Dec 2024 – Feb 2026

- **MCP**-based multi-agent (plan/act/verify) with **vLLM** hosting and document synthesis pipeline.
- Designed agent eval loop and data augmentation for continual improvement.
- Collaborated with partner engineers to align the AI assistant with product requirements and client workflows.

EDUCATION

2023.08 – 2026.08 **M.S. in Artificial Intelligence** (Expected Aug. 2026), Department of Artificial Intelligence, College of Informatics, **Korea University**
2017.03 – 2023.08 **B.S. in Mathematics & Computer Science**, Jeonbuk National University
2014.03 – 2017.02 **Honam Jeil High School**

PUBLICATIONS

- **Roh, K.** *Hierarchical Cascading for Cost-Efficient Text Generation with Large Language Models*. **KCC 2025**, Jul 2025.
- **Roh, K.** *XLQA: A Benchmark for Locale-Aware Multilingual Open-Domain Question Answering*. **EMNLP 2025**.

LEADERSHIP & ACTIVITIES

President & ML Mentor, JBIG Big Data Club, Jeonbuk National University Mar 2022 – Aug 2023

- Led a 30-member AI & data science club focused on applied machine learning and analytics.
- Organized weekly ML seminars and hands-on projects using Python and scikit-learn.

CERTIFICATIONS

- **OPIc IH (Intermediate High)**, Sep 2024
- **DeepLearning.AI TensorFlow Developer Specialization**, Coursera, 2024
- **Google Machine Learning Bootcamp**, Google Developers, 2024
- **Full-Stack Developer Bootcamp**, Goorm, 2025
